ABOUT ME

I am a hardworking and motivated individual with an eagerness to learn and better myself. Last year I completed a career change into the world of tech through graduating from the Le Wagon full stack development bootcamp then shortly after starting as a project support developer at Kayo Digital.

EXPERIENCE

KAYO DIGITAL

Project Support Developer December 2021 - Present

As a project support developer, I am responsible for supporting the production team with an array of tasks from creating wireframes to building out components for the front end of websites before it gets converted into a CMS system (Umbraco, WordPress & Shopify). I am responsible for looking after the help desk ticket system. This is where clients get in touch about errors or new work they require actioning.

Key Tasks:

- Supporting production team
- Wireframes
- Supporting clients through the help desk system
- Front end changes
- Delegation of work to relevant developer (backend/frontend)
- CMS Training session with clients (Remote through teams)
- Server set ups
- Testing
